NOTICES

Dear Community Members,

Our class of landscape architecture students from the graduate program at the University of Maryland's Department of Plant Science and Landscape Architecture has been invited to the town to develop a vision that would make Forest Heights "the Bluest Town in Maryland." Our goal is to examine the impact that previous development activities in and around the town have had on the natural drainage and infiltration of storm water and to create a *long-term* plan that would mitigate those effects and add valuable amenities to the town. To best serve the town and fulfill the goals of the studio we require a thorough understanding of the storm water impact and issues of concern to the citizens of Forest Heights. We invite your presence and participation as we present our initial analysis to the community and gather feedback. Please join us in a presentation and a discussion of water related issues concerning the Town of Forest Heights, Wednesday, October 7, at 6:00 PM prior to regular workshop meeting at the Town Hall.
